**Dear Hiring Manager,**

I am a recent graduate in Artificial Intelligence from Asia Pacific University, eager to contribute to the AI, data science, or software development industry. With a solid academic foundation and hands-on experience from multiple university projects, I am actively seeking an entry-level opportunity where I can apply my skills, continue learning, and grow into a valuable contributor to a professional team.

During my degree, I worked on several practical projects that allowed me to apply machine learning, deep learning, and natural language processing techniques in real-world scenarios. My final year project focused on developing an AI-powered emotional assistant using NLP — giving me experience with language models and user-centered design. I also built a predictive model for esports match outcomes and a reinforcement learning agent for the Flappy Bird game, strengthening my understanding of AI algorithms and decision-making systems.

In addition to technical proficiency in Python, TensorFlow, scikit-learn, and data analysis tools, I bring strong soft skills such as teamwork, communication, and leadership. These were especially important when organizing the EarnSeed webinar event, where I coordinated external speaker engagement and supported event execution.

Outside of formal coursework, I am continuing to deepen my knowledge through independent research in two key areas: Generative Adversarial Networks (GANs), with a focus on image generation, and Transformer architectures for natural language understanding. This ongoing exploration keeps me engaged with the latest AI developments and demonstrates my commitment to continuous learning.

I am particularly passionate about the growing applications of AI in improving lives and solving complex problems. I am open to roles in AI development, data analytics, NLP, or related areas — and I am committed to continuous growth and collaboration in a professional setting.

Thank you for taking the time to review my profile. I look forward to exploring opportunities where I can contribute and develop as part of a forward-thinking team.

Sincerely,

**Yong Zhen Xing**
